

## CHECKOUT OVERVIEW

# From cart to paid.

A clear view of how an Ezkart customer adds products, enters delivery details, chooses shipping, and completes payment securely through Duitku.

[ezkart.id/cart](https://ezkart.id/cart)**Purpose**

Merchant onboarding and sandbox checkout review.

**Customer promise**

No banking credential is entered into or stored by Ezkart.

**Demo status**

Visible sandbox labels ensure no test is mistaken for a real charge.

## FOUR SIMPLE STEPS

# The customer stays oriented from start to finish.

Each step shows the current total and makes the next action explicit. Required information is validated before a shipping quote is created.

1

CART

## Add products

The customer adds products, adjusts quantities, and reviews the subtotal before checkout.

OAT

Granola Madu Nusantara

Qty 1 · 320 g

Rp58.000

2

CUSTOMER

## Enter delivery details

Full name, WhatsApp number, email, location, street address, and postcode are collected.

Nadia Putri

Kebayoran Baru, Jakarta Selatan

Jl. Senopati No. 10 · 12190

3

SHIPPING

## Select a quoted service

Available services show courier, service level, estimated arrival, and the quoted price.

JNE

JNE REG  
2-3 days

Rp15.000

J&amp;T

J&T EZ  
2-4 days

Rp13.500

4

DUITKU

## Pay securely

The customer chooses an available Duitku method and pays on the secure provider page.

QR

QRIS &amp; E-wallet

VA

Virtual Account

Credit / debit card

## CLEAR RESPONSIBILITY

# Duitku receives what it needs to process payment.

Product selection, delivery details, and shipping choice are completed before the secure payment handoff.

## Ezkart

Owns the shopping and delivery experience.

- ✓ Cart products and quantities
- ✓ Customer contact and delivery address
- ✓ Shipping service and quoted price
- ✓ Order total and merchant reference
- ✓ Order status shown to the customer

## DUITKU

Owns the secure payment experience.

- ✓ Merchant and order reference
- ✓ Final amount to be paid
- ✓ Short order description
- ✓ Customer contact for the transaction
- ✓ Callback and return destination

**Sensitive credentials remain with the payment provider.**

Ezkart never requests or stores the customer's card number, PIN, OTP, banking password, or wallet credentials. Duitku returns the transaction result so Ezkart can update the order.

## AFTER PAYMENT

# A verified result completes the order.

The customer sees a clear outcome while the merchant receives the reference needed to continue fulfilment.

**Duitku processes the selected method**

The customer completes all payment-specific actions on Duitku's secure experience.

PROVIDER

**Payment notification is verified**

Ezkart treats the provider notification—not a browser action—as the authoritative payment result.

SERVER

**The customer receives confirmation**

The success screen shows order reference, paid status, total, and selected payment group.

CUSTOMER

**The merchant can fulfil the order**

With payment confirmed, the merchant can prepare the package and arrange delivery.

MERCHANT

## Try the interactive sandbox checkout

Add a product and follow the guided flow. No real order or charge will be created.
